

Elective Student Emily

February 2018

Emily who hails from Missouri, USA, was one of our first elective students for the 2018 academic year at Tygerberg Paediatric Hospital. The elective student program is hosted by HOPE Cape Town in partnership with KIDCRU Research Unit. During her time with us, Emily presented “An Introduction to HIV Drug Resistance” which was an interesting comparative study of drug resistance with single ARVs in the USA and Europe vs multiple ARVs in South Africa.
